                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         A;Note: an engineered sequence was used to obtain high-yield expression in an E. C;Comment: This zinc-containing protein (7-12 n/molecule), which interacts with f these genes by RNA polymerase III. It also binds the transcribed SS RNAs. C;Comment: Most of the Cys and His residues are ligands for zinc binding.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Nucleic Acids Res. 19, 6871-6876, 1991

C34895
SS RNA-binding protein p43 - African clawed frog
SS RNA-binding protein p43 - African clawed frog)
C:Species: Xenopus laevis (African clawed frog)
C:Species: 20-Jul-1990 #sequence_revision 21-Oct-1992 #text_change 21-Aug-1998
C:Accession: C34895
R:Joho, K.E.; Darby, M.K.; Crawford, E.T.; Brown, D.D.
Cell 61, 293-300, 1990
A;Tille: A finger protein structurally similar to TFIIIA that binds exclusively
A;Reference number: A34895; MUID:90235278; PMID:2331751
A;Accession: C34895
A;Status: preliminary; nucleic acid sequence not shown
A;Residues: 1-365 < JOH>
C:Superfamily: transcription factor IIIA
C:Superfamily: transcription factor IIIA
C;Keywords: DNA binding; zinc finger
                                                                                                                                                                                                                                                                                                                                                  A; Title: A finger protein structurally similar to TFIIIA A; Reference number: A34895; MUID:90235278; PMID:2331751 A; Accession: A34895
